There is no need for new environmental legislation but more support is required from government for CDM through the establishment and maintaining the role of DNA. The importance of renewable energy sources in the energy portfolio of any country is well known, especially in the context of energy security and impacts on climate change. Nevertheless, the international community should be assured that China is genuinely interested in leading the world in one particular sector: deployment and investment in renewable energy. SolutionstocontrolPollution.Thesecountriesdependheavilyonpetroleum. Explore the latest strategic trends, research and analysis. Still, questions need to be raised, including why the region did not witness registration of a CDM project until and why there are no CDM projects in the oil and gas industry, which is the dominant industry in the region.
