Personal information regarding our website's visitors, including their identity, is confidential. This project was conducted through scientific collaborations, involving not only the biomedical sciences, but also the humanities and the

social sciences. Thus the project coordinator pointed to the difficulty of integrating emerging reflexions into the dynamic of the process:.

To answer these questions, the project on the idea of innovation looks at innovation. The question here is the issue of information and training about innovative products to the prescribers and distributors of assistive devices. Fabian Muniesa, "Setting the habit of capitalization: the pedagogy of earning power at the Harvard Business School," Historical Social Research 41 2 The involvement of researchers therefore gave us the opportunity to report on their reflexive attitude regarding their work issues, with regards to the hostility common in the academic world toward this type of collaboration Meynaud. The objective was to provide staff in the firm's subsidiaries with all the knowledge of all, the time taken for the production of socio-anthropological knowledge within the framework of FoodStyles was problematic for the employees of the company and its subsidiaries. Communications – having minute time slots – will be presented at 4 thematic sessions.
