Criteria and indicators of sustainable forest management are widely used and many countries produce national reports that assess their progress toward sustainable forest management. Early ecological literature on ESS continued to focus on the supporting services for example, 17which echoed the familiar-to-ecologists ecosystem processes but which often stopped just short of articulating the direct benefit to people, whereas the economics literature at the time sought to value nature in terms of its utility to humans as a way of internalizing externalities

Their canopies help to buffer temperature extremes, reducing the demand for For them, well-being is measured in a more integrated way that places economic satisfaction within a broader context of social experience and their natural surroundings Wali This balance is critical to the survival of forests, and to the prosperity of forest-dependent communities. Become a member. We determine what groups of people are critical to work with through an initial

measured indicators reveal the direction of change with respect to each criterion. The Journal of Peasant Studies
