Robert Nisbet. Statistics for Sport and Exercise Studies guides the student through the full research process, from selecting the most appropriate statistical procedure, to analysing data, to the presentation of results, illustrating every key step in the process with clear examples, case-studies and data taken from real sport and exercise settings. The book also offers an in-depth and practical guide to using SPSS in sport and exercise research, the most commonly used data analysis software in sport and exercise departments.

His expertise is in advanced statistical methods with an emphasis on applications. Updating results Seller Inventory ST Fulfilment Centre Email: mys kinokuniya.

Ratings and Book Reviews 00 star ratings 0 reviews. Book Description Taylor & Francis chapter includes a range of features designed to help the student grasp the underlying concepts and relate each statistical procedure to their own research project, including definitions of key terms, practical exercises, worked examples and clear summaries.
